

Gandham Satish Kumar

Full Stack Developer |Hyderabad, India

Email: satishkumargandham0@gmail.com | **Phone:** +91 8897726210

SUMMARY

Full Stack Developer with 3 years of experience in **Java, Spring Boot, React.js, and RESTful APIs**. Skilled in backend and frontend development, cloud automation, and deployment. Improved API performance by 35%, reduced production defects by 30%, and increased code coverage to 85% using JUnit and Mockito. Experienced in **Azure Logic Apps, Azure Functions, Heroku, CI/CD pipelines with Jenkins, PostgreSQL, Git, Docker, Kubernetes, and Agile methodologies**.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, SQL, HTML, CSS
- **Frameworks:** Spring Boot, React.js, Java EE
- **Databases:** PostgreSQL, MySQL
- **Cloud & DevOps:** Azure Logic Apps, Azure Functions, Jenkins, Git, Docker, Kubernetes
- **Deployment:** Heroku
- **Testing:** JUnit, Mockito, Postman
- **Concepts:** REST APIs, Microservices, API Security, Exception Handling, Performance Optimization
- **Methodology:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer

Sloperate Techno Pvt Ltd | Hyderabad, India

August 2023 – March 2026

- Designed and maintained **RESTful APIs** using Spring Boot.
- Built backend services with layered architecture (Controller, Service, Repository).
- Implemented **global exception handling** and secure API integrations.
- Fixed production defects, reducing defect rate by 20%.
- Supported **CI/CD deployments** using Jenkins pipelines.
- Performed API testing and validation using Postman.
- Optimized database queries, reducing API latency by 20%.
- Collaborated with frontend, QA, and cloud teams to deliver enterprise applications.
- Built **React.js frontend modules** for product catalog and checkout workflows, improving customer experience.

Full Stack Developer

Potla Tech Solution Pvt Ltd | Hyderabad, India

March 2026– Till Now

- Designed and developed RESTful APIs using Java and Spring Boot following layered architecture (Controller, Service, Repository).
- Implemented global exception handling and secure API integrations to improve application reliability.
- Optimized SQL queries and database interactions, reducing API response time.

PROJECTS

Project Name: Urban-Maverick – E-Commerce Full Stack System *April 2025 – Present*

Technologies: Java, Spring Boot, React.js, PostgreSQL, Razorpay, Heroku, JUnit, Mockito

- Developed 20+ RESTful APIs for order management and payment processing.
- Built React.js frontend modules for product catalog and checkout workflows.
- Integrated Razorpay payment gateway handling 1,000+ monthly transactions.
- Improved API response time by 35% through backend optimization.
- Reduced payment failures by 25% with enhanced validation mechanisms.
- Wrote 20+ unit test cases increasing code coverage to 85%.
- Resolved 20+ production issues reducing defect rate by 20%.
- Deployed application on Heroku, improving deployment efficiency by 40%.

Project Name: Sephora – Azure Cloud Workflow Automation *Feb 2024 – Mar 2025*

Technologies: Azure Logic Apps, Azure Function Apps (Java), REST APIs

- Designed and developed 15+ automated workflows integrating enterprise systems.
- Built Azure Function Apps for backend event-driven processing.
- Integrated REST APIs with secure authentication.
- Implemented logging, monitoring, and error handling frameworks.
- Reduced manual processing effort by 40% through automation.
- Decreased runtime failures by 30% via improved validation and monitoring.

Project Name: Intuit – Enterprise API Enhancement & Optimization *Aug 2023 – Jan 2024*

Technologies: Java, Spring Boot, PostgreSQL, Jenkins

- Removed 50+ feature flags and deprecated test cases, reducing technical debt and improving maintainability. Developed and maintained unit test cases with JUnit, increasing code coverage to 85% and reducing regression defects.
- Optimized API response times by 30% through backend code improvements, enhancing performance. Implemented global exception handling, reducing crash incidents by 25% and improving error traceability.
- Enhanced existing controller, service, and repository layers, improving modularity and reducing defect recurrence by 15%.
- Assisted in CI/CD deployments using Jenkins pipelines, reducing release cycle time by 25% and improving delivery efficiency.

EDUCATION

B.Tech in Computer Science & Engineering

Kallam Harinadha Reddy Institute of Technology (JNTU-K), Guntur

2019 – 2023

ACHIEVEMENTS

- Recognized with a **4/5 performance rating** for consistently delivering high-quality solutions.
